Upgraded Eagle Search interface now live!

By Chelsea Post

Over the summer, Warner Library transformed its Eagle Search tool with a new user interface that prioritizes ease of searching and a cleaner aesthetic. Finding Eagle Search is simple—just head to the [library's homepage](#) and type your topic into the top search bar—and using it is even simpler.

The largest difference from the old interface is where to find the filters. They are now in a collapsible menu underneath the search bar, allowing for a less-cluttered appearance in the search results. You will also notice some new features like saving individual results using a bookmark icon, and a Dashboard to the left where you can see (and save) recent searches.

Want to learn more? You can watch our [“Crash Course on Eagle Search” video](#), found on our refurbished tutorial page! Also, you can ask any questions you have at the Information Desk or reference1777@eastern.edu.

The screenshot shows the Eagle Search interface. At the top, there is a search bar containing the word "eagle". To the right of the search bar are icons for clearing the search, searching, and a user profile. Below the search bar is a row of filter buttons: "All filters (2)", "Online full text", "Peer reviewed", "All time", and "Source type". To the right of these filters is an "Advanced search" link. Below the filters, the search results are displayed. The first result is an eBook titled "Eagles". The description of the eBook is partially visible: "Simple text and incredible close-up photographs bring out the importance of eagle details about the body parts, habitat, and nesting of these powerful birds of prey. I". Below the description is a small image of an eagle. To the right of the image, the subjects are listed: "Subjects: JUVENILE NONFICTION / Animals / Farm Animals; JUVENILE N Geese, etc.; JUVENILE NONFICTION / Animals / Baby Animals; Eagles--j". Below the subjects, the publication information is shown: "Published in: Xtreme Raptors, 2017, eBook Collection (EBSCOhost)" and the author: "By: S.L. Hamilton". At the bottom of the result, there are two buttons: "Access now (eBook)" and "View details".

Research guides (also known as library guides or LibGuides) are mini websites designed to manage content and share information in the online library space.

The LibGuide platform allows for easy navigation through and instruction on core and relevant resources in a particular subject, class, or assignment.

Provide students with library curated resources tailored to your instruction simply by linking to a research guide in your Brightspace course.
